COMBINED FEATURES

Medium viscosity for good wet out of all synthetic composite fabrics and core materials.

Slow cure speed hardener provides 4 to 5 hours of working time at 25°C. A typical laminate will be gelled in 6 to 7 hours.

Optimized for hand wet out and machine impregnation in contact moulding, vacuum bagging and filament winding applications.

Room temperature cure properties suitable for many composite components and structures.

Tg as high as 111°C with proper post cure providing excellent temperature stability and great part cosmetics.

Cost effective, high performance epoxy formulation for synthetic composite manufacturing.
